OVERTON, TX 75684-1261

SUBJECT: **LEAD AND COPPER TAP SAMPLE MONITORING**
CITY OF OVERTON - PWS ID NO. TX2010002
RUSK County, TX

Attention: Public Water System Owner / Manager / Operator

Title 30 of the Texas Administrative Code (30 TAC), Chapter 290, Section 290.117, *Regulation of Lead and Copper* and Title 40 of the Code of Federal Regulations (40 CFR), Chapter I, Subchapter D, Part 141, Subpart I, *Control of Lead and Copper*, establishes requirements for public water systems (PWS) to monitor for and meet designated lead and copper levels.

Based on the Texas Commission on Environmental Quality's (TCEQ) records, **your PWS is scheduled to conduct lead and copper tap sampling for reduced monitoring between June 1 - September 30, 2024.** Please disregard this letter if your PWS has completed both monitoring and lead consumer notice requirements.

TCEQ's Texas Drinking Water Watch is available to view and confirm your PWS's Lead and Copper Rule sampling requirements, sample results, sampling schedules, violations, points of contact, and more, located at:

< www.tceq.texas.gov/goto/dww >

The TCEQ provides necessary compliance guidance, forms, laboratory information, sampling instructions, and monitoring schedules on the TCEQ Drinking Water Lead and Copper Program webpage, located at:

< https://www.tceq.texas.gov/drinkingwater/chemicals/lead_copper/lead-copper.html >

If you have questions or require additional assistance concerning lead and copper monitoring requirements for your PWS, please contact the TCEQ LCR program at (512) 239-4691 or PWSLCR@tceq.texas.gov.

Please note the following steps for sampling under the LCR:

- **Complete TCEQ Form 20467 (a) or (b), Lead and Copper Sample Site Selection Pool and Material Survey if needed.** All PWSs are required to have an updated sampling pool of addresses. If you have not completed this form in the past or do not have a complete sampling pool with an updated Materials Survey, you are required to update your sampling pool prior to sampling. Instructions for identifying suitable sample taps, including targeted tier requirements within the sampling pool can be found in 30 TAC Chapter 290, Section 290.117(c)(1)(C) and the TCEQ Drinking Water Lead and Copper Program webpage. Enclosed please find the sample sites currently approved and on file with the TCEQ.
- **Locate a NELAP accredited laboratory that uses methods associated with the LCR.** The laboratory you choose can provide the required laboratory grade one-liter bottles for sampling, including the EPA-recommended wide-mouth bottles. The list of accredited laboratories can be found on the TCEQ Drinking Water Lead and Copper Program webpage.
- **Complete TCEQ Form 20683, the Lead and Copper Rule Monitoring Form.** This is your chain of custody which accompanies your bottles to the laboratory. The LCR chain of custody can be found on the TCEQ Drinking Water Lead and Copper Program webpage. Please note that sample collection sites must be matched to their corresponding LCR numbers on all paperwork and sample bottles when submitted to the laboratory.
- **Complete TCEQ Form 20680 (a) or (b), Lead Consumer Notice (LCN).** Requirements for the LCN can be found in 30 TAC Chapter 290, Section 290.117(j). All forms including the LCN can be found on the TCEQ Lead and Copper Rule (LCR) program webpage. This form can also be submitted to PWSLCR@tceq.texas.gov when sampling is complete.

Sincerely,

Laura Higgins, Section Manager
Drinking Water Standards Section
Water Supply Division
